RELOCATION & SHIPPING GUIDE

WHAT WE DO

We negotiate the best shipping rates, handle and support the entire process of packing, inland trucking, storage, shipping, customs clearance, delivery, and in building setup including furniture assembly. **(Some services are limited at some locations)**

WHERE TO START

Set a reasonable timeline for a shipping date and determine what needs to be shipped.

WHAT WE NEED

Cargo Details - The volume of cargo to provide a quote. Total piece count, weight and dimensions of each piece to determine the entire volume. Details of special items like vehicles, antique furniture, artwork, precious metals and jewelry are to be noted separately.

Packing|Crating & Shipping Supplies - packing, crating and shipping supplies are available at some locations.

Value of Cargo - a value for the entire shipment is needed for transit insurance and customs clearance. New residents arriving in the Cayman Islands are allowed a duty free clearance on used personal effects within the first six (6) months of residency. New items require original supplier invoices and will be dutiable in The Cayman Islands.

Origin/Destination - country, city and zip code details are needed for inland transport and shipping cost. It determines best routing and if special services and or equipment are required. Site visit may be requested.

Transport & Storage - ocean freight service is mostly used for international relocation when compared to air freight. Both options are available. Storage at origin and destination maybe available but is limited.
